### Teacher Notes

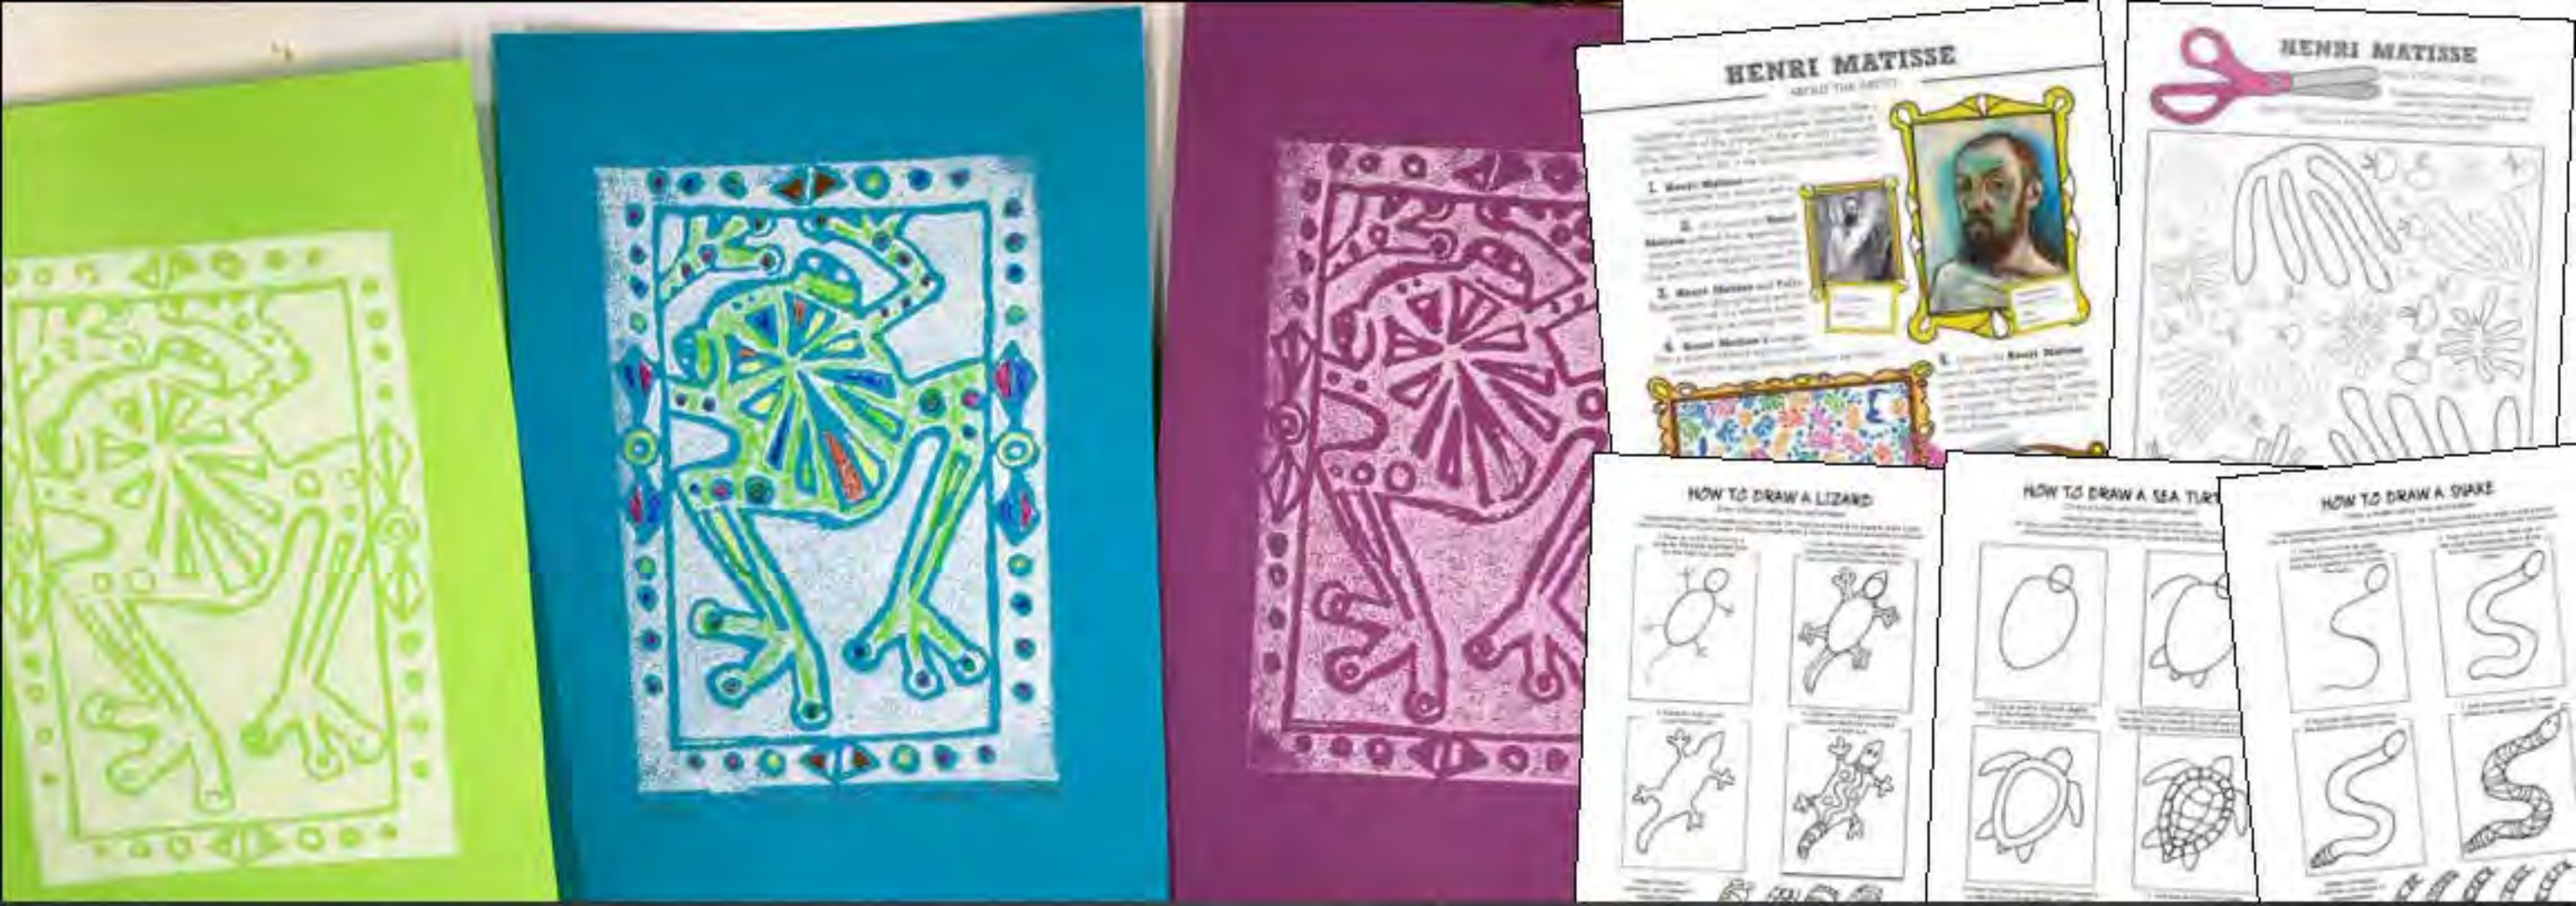

- This is a wonderful project to use with your students. I like to have the students work in pairs and challenge each other to create the most interesting and unique handprints. If you allow them to use any materials they want, they will create a great project. I have used this project in my classroom and it was a success.
- Students will use their knowledge of positive and negative space and how to complete the shape of the paper to create a strong composition. They will use their knowledge of color and texture to create a unique handprint.
- I have 3 steps to complete this project to allow for student creativity and choice. Day 1 is a great start to the project. Day 2 is a great day to have students work on their own project. Day 3 is a great day to have students work on their own project.
- Use this project to teach students how to use their knowledge of color and texture to create a unique handprint. This project is a great way to teach students how to use their knowledge of color and texture to create a unique handprint.
